Applicant's election without traverse of species I, Figs. 1-3, claims 1-6, 17-19, in the reply filed on 5/18/05 is acknowledged.

Claims 7-16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 5/18/05.

The drawings are objected to because figs. 6-8b are not labeled "Prior art". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Art Unit: 3654

The disclosure is objected to because of the following informalities: it appears that "31" is used for two different elements, that "aperture" (page 9, line 24) is misspelled. Furthermore, figs. 8a nad 8b should be described separately in the Brief Description of Drawings. Appropriate correction is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ray (US-3620474). Note the flexible material flange 16.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ray (US-3620474) in view of applicant's admitted prior art.

Applicant's admitted prior art shown in fig. 7 shows a porous flange. It would have been obvious to a person having ordinary skill in the art to provide the flange of

Art Unit: 3654

Ray as being porous as taught by the admitted prior art to release air during winding to obtain a more uniform winding.

Claims 17-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ray (US-3620474).

The claimed thicknesses would have been within the level of one of ordinary skill in the art and would have been determined through routine engineering experimentation and optimization, according to the type and thickness of tape to be used with the reel.
